

Shaun Minné, designer

728 Maroon Peak Circle, Superior, Colorado 80027 Tel 720.206.7325 email: shaun@greenmountainside.com

Professional Profile

My education in Industrial design provides a unique perspective, viewing design as a whole rather than drawing distinct lines between architecture, interiors, environmental design, and graphics. This approach focuses on a cohesive design resulting in thoughtful, innovative solutions. My involvement in various types of projects has included all aspects of the design process from initial conception, to construction documents through construction administration, while working closely with both clients and contractors. I accomplish the clients goals within tight budget and time constraints with a strong problem solving ability, technical experience, design sensitivity, and attention to detail while strengthening client relations.

Accomplishments

- LEED Accredited Professional, Version 2.2
- Designed a 8,313 square foot custom home from design concept through construction administration, including construction documents, on a moderate budget in an accelerated time frame. The entire design process and construction was complete in eighteen months for \$170 per square foot and was featured in the 2004 spring issue of Colorado Expressions Magazine.
- ARE eligible - passed half of exams and will sit for remainder of exams.
- Developed and implemented marketing database for new clients resulting in securing over \$100,000 in project fees in six months as marketing director for a small architectural and interiors firm while performing usual duties as project designer.
- Proficient at Bentley Microstation CAD, AutoCad 2007, Adobe Illustrator, Adobe Photoshop.
- Was member of design team winning several awards: Detroit AIA 1990 Design Excellence Award - Beckman Institute of Illinois; Masonry Institute of Michigan 1991 Honor Award - Beckman Institute of Illinois; C.A.M. 1991 Construction Showcase Award - BASF World Headquarters; Michigan Society of Professional Engineers 1990 Outstanding Achievement Award - Beckman Institute of Illinois.
- Taught introduction to interior design class for College for Creative Studies continuing education program.
- Hold certification from The Designers Lighting Forum and Illuminating Engineering Society, Michigan Chapter
- Recipient of Ford Motor Company Scholarship for design excellence.

Major Projects

Residential

LaMee Residence, Sedalia, Colorado 8,313 SF new construction
